Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Davison et al. 5,322,055. Davison discloses the invention as claimed comprising an elongate insert portion, an operating portion located on a distal end portion of the insert portion, a handling portion coupled to a proximal end portion of the insert portion, a covering tube located around the insert portion, a vibration transmitting member passed through the covering tube, a jaw supported opposite an ultrasonic probe, a control handle, and a handling force transmitting member coupled to the jaw and the control handle.

Regarding claims 2 and 3, note figures 3,5,8p and 8q.

Regarding claim 4, note figures 8k-8o.

Regarding claim 5, note figures 1a and 1b for a tip changing tool body and figures 6 and 7 for wedge-shaped separating portions.

Regarding claims 6-8, Davison discloses a locking means 42 as shown in figure 2. Note column 8, lines 18-28.

Regarding claim 10, Davison discloses the handle unit having a first handle 70 and a second handle 72. Note figure 2.

Regarding claim 11, the covering tube 22 is considered as an insert sheath.

Response to the Applicant's Remarks

2. The applicant arguments filed on 8/11/06 have been fully considered but they are not persuasive. The arguments stating that "As shown in Fig. 1a,1b,1c and Fig. 3 of Davison, elongated tube 22 is integral with the clamping jaw 24" are not correct because Fig. 3 clearly shows that the clamping jaw 24 is connected to tube 22 and is pivoted about axis 90. For the statement saying that "but there is no indication that the blade 20 and the jaw 24 are coupled for joint rotation" applicant should refer to Figs. 3 and 5 in which the blade 20 and the jaw 24 are coupled and the jaw 24 is rotated about an axis 90.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
